

TCAT to COMMUNITY COLLEGES ARTICULATION

It's easier than ever for Tennesseans to turn their technical skills and training into college credit toward an associate degree thanks to a statewide partnership between Tennessee's community and technical colleges. Students can earn a credential at a Tennessee College of Applied Technology (TCAT) and then apply those credits to an aligned program at a partnering community college to earn an Associate of Applied Science degree.

More than 30 current programs offered throughout Tennessee's technical colleges allow students to transfer between six and 27 credit hours toward an associate of applied science degree at a participating community college, such as administrative office technology, industrial maintenance, aviation, construction, machining, computer technology, welding and most health programs.

By following a pathway, students can get the technical skills they need to start a successful career now and then continue their education to even higher levels.
